In the specification

Please replace the paragraph on page 14, line 15, through page 14, line 21, with the following paragraph:

FIG. 3 shows a color calibration software module 302 that can implement the configurable and flexible color calibration of an embodiment of the invention. For example, the module 302 may perform the method 100 of FIG. 1 that has been described. The module 302 may be implemented within a computer, a device to be color calibrated, such as a printer, or another device. The module 302 includes a measuring tool interface 304, a data converter 306, a user interface 308, a color calibration manager 310, and a color calibration algorithm library [[310]] 311.
